

Brief Introduction of T-460 Box Truck Refrigeration Unit

T-460 box truck reefer unit is high-end truck reefer units designed for 16-19m³ truck box for perishable cargoes delivery. It can be also equipped with standby system to increase the cooling system working time.

Features of T-460 Box Truck Reefer Unit

- *Large cooling capacity to ensure the safety of transported goods
- *Exhaust with large air volume to ensure the freshness of the goods
- *Special defrost system, defrost more thoroughly
- *Wide temperature adjustment range (-23°C to +18°C)
- *Full computer control, easy and safe to operate
- *Quick installation and easy maintenance, saving operating costs

Application of T-460 Refrigeration Unit for Box Truck

The T-460 truck units are vehicle engine powered units, its compressor is driven by vehicle engine, and it is suitable for the large refrigerated truck box with 16-19m³ size.

For its electric standby unit, its compressor is powered by outside power supply, when truck stops with the standby turning on, it can still work.

Technical Data

Model		T-460
Temperature Range in Container		-18°C ~ +20°C
Application of Volume		16-19m ³
Cooling capacity	0°C	4300W
	-18°C	2250W
Refrigerant		R404a
Defrosting		Hot gas defrosting(Auto./Manual)
Compressor displacement		163cc
Evaporator	Material	Inner grooved copper tube
	Weight	24kgs
Condenser	Material	parallel flow
	Weight	32kgs
