

Brief Introduction of T-560 Refrigeration Unit for Truck

T-560 refrigeration unit for truck is designed for larger truck box with 16-20m³ size for temperature sensitive cargoes delivery. It can keep temperature in container from -18°C to 25°C for deep frozen, frozen or chilled fresh delivery.

Features of T-560 Refrigeration Unit for Truck

- *Large cooling capacity to ensure the safety of transported goods
- *Exhaust with large air volume to ensure the freshness of the goods
- *Special defrost system, defrost more thoroughly
- *Wide temperature adjustment range (-23°C to +18°C)
- *Full computer control, easy and safe to operate
- *Quick installation and easy maintenance, saving operating costs

Application of T-560 Refrigeration Unit for Truck

For T-560 reefer unit for truck, it is mainly used for Isuzu truck chassis to build into a refrigerated trucks. Besides the truck refrigeration units, KingClima can also provide related refrigerated truck box to help customer build the refrigerated truck business.

Technical Data

Model		T-560
Temperature Range in Container		-18℃ ~ +20℃
Application of Volume		16-20m3
Cooling capacity	0℃	4500W
	-18℃	2450W
Refrigerant		R404a
Defrosting		Hot gas defrosting(Auto./Manual)
Compressor displacement		163cc
Evaporator	Material	Inner grooved copper tube
	Weight	26kgs
Condenser	Material	parallel flow
	Weight	35kgs
