

Brief Introduction of T-860 Transport Refrigeration System

For larger truck box to build into a refrigerated trucks, the T-860 is suitable for 32-35m³ truck box. It has the feature of fast cooling speed and large cooling capacity to make the refrigerating performance best.

KingClima as the leading supplier and manufacturer of truck refrigeration manufacturers supply the competitive price of products to our customers and we also invite distributors and installers to resell in local areas. Besides the transport refrigeration system, we can also supply the refrigerated truck box to help you build your cold chain logistics business.

Features of T-860 Transport Refrigeration

- *Large cooling capacity to ensure the safety of transported goods
- *Exhaust with large air volume to ensure the freshness of the goods
- *Special defrost system, defrost more thoroughly
- *Wide temperature adjustment range (-23°C to +18°C)
- *Full computer control, easy and safe to operate
- *Quick installation and easy maintenance, saving operating costs

Application

T-860 is KingClima T series largest truck refrigeration units for 32-35m³ box. Customers can also choose the electric standby system for different demands.

Technical of T-860 Transport Refrigeration System

Model		T860
Temperature Range in Container		-18℃ ~ +20℃
Application of Volume		32-35 m3
Cooling capacity	0℃	6500W
	-18℃	3450W
Refrigerant		R404a
Defrosting		Hot gas defrosting(Auto./Manual)
Compressor displacement		210cc
Evaporator	Material	Inner grooved copper tube
	Weight	35kgs
Condenser	Material	parallel flow
	Weight	47kgs
