

DC320V、DC720V

Quick Installation, simple maintenance and low maintenance cost

DC powered driven

Green and Environmental Protection.

Full digital control, easy to operate

Brief Introduction of K-500E Full Electric Truck Refrigeration Units

K-500E is front mounted electric truck refrigeration units for 22-26m³ truck box. It is eco-friendly and zero emission. High voltage DC320V or DC540V voltage for choice connecting with truck battery.

As for now, the zero emission trucks are new trend in world and as for KingClima, we are the China only one manufacturer and supplier of electric truck refrigeration units. The reliable working performance of our electric truck refrigeration units get our customers' like.

Optional Standby System for Choice

Customers can choose electric standby system if you need to cooling the cargoes all day long and night. The electric grid for standby system is: AC220V/AC110V/AC240V

Features of K-500E Electric Truck Refrigeration Units

- ★ DC320V、DC720V
- ★ Quick Installation, simple maintenance and low maintenance cost
- ★ DC powered driven
- ★ Green and Environmental Protection.
- ★ Full digital control, easy to operate

Technical Data of K-500E Refrigeration Units for Zero Emission Trucks

Model	K-500E
Unit installation mode	Evaporator、 condenser and compressor are integrated.
Cooling capacity	5550W (0℃)
	3100 W (-18℃)
Volume of container (m3)	22 (-18℃)
	26 (0℃)
Low Voltage	DC12/24V
Condenser	Parallel flow
Evaporator	copper pipe & Aluminum Foil fin
	Foil fin
High Voltage	DC320V/DC540V
Compressor	GEV38
Refrigerant	R404a
	2.1~2.2Kg
Condenser Dimensions	1600×809×605
Standby Function	(Option, Only For DC320V Unit)
