

Electric refrigerated two-wheeler

The main structure of the product:

Car body: The inner and outer skins are sprayed with steel plate, and the materials of FRP and stainless steel can also be customized. The car body is made of PU polyurethane integrated injection foaming, and the thickness of the insulation layer is 58mm, which has a good insulation effect. The car body is designed to hold the built-in unit and the battery on the other.

Refrigeration unit: The unit uses a DC rotor frequency conversion compressor, which is a battery-driven compressor specially mounted on the vehicle. It has no fuel and low maintenance cost. It has the advantages of anti-turbulence and tilting.

Frame: stylish appearance, powerful battery, vacuum tires, speed change handle, car basket, turn signal. The car body is small and exquisite, it can shuttle through the lanes and over the mountains.

Model No.	Brand	size	Volume	Car motor power	Cooler Unit voltage	Cooler unit power	Temperature Range(°C)
KT-D128-LC	Made in China	800*620*840	128	400	DC12v	320	0-20adjustable
KT-Z128-LC						320	8-5 adjustable
KT-D128-LX48	No car			No car		320	0-20adjustable
KT-D128-LX48				No car		320	8-5 adjustable
